

Comprehensive Clustering Analysis Results

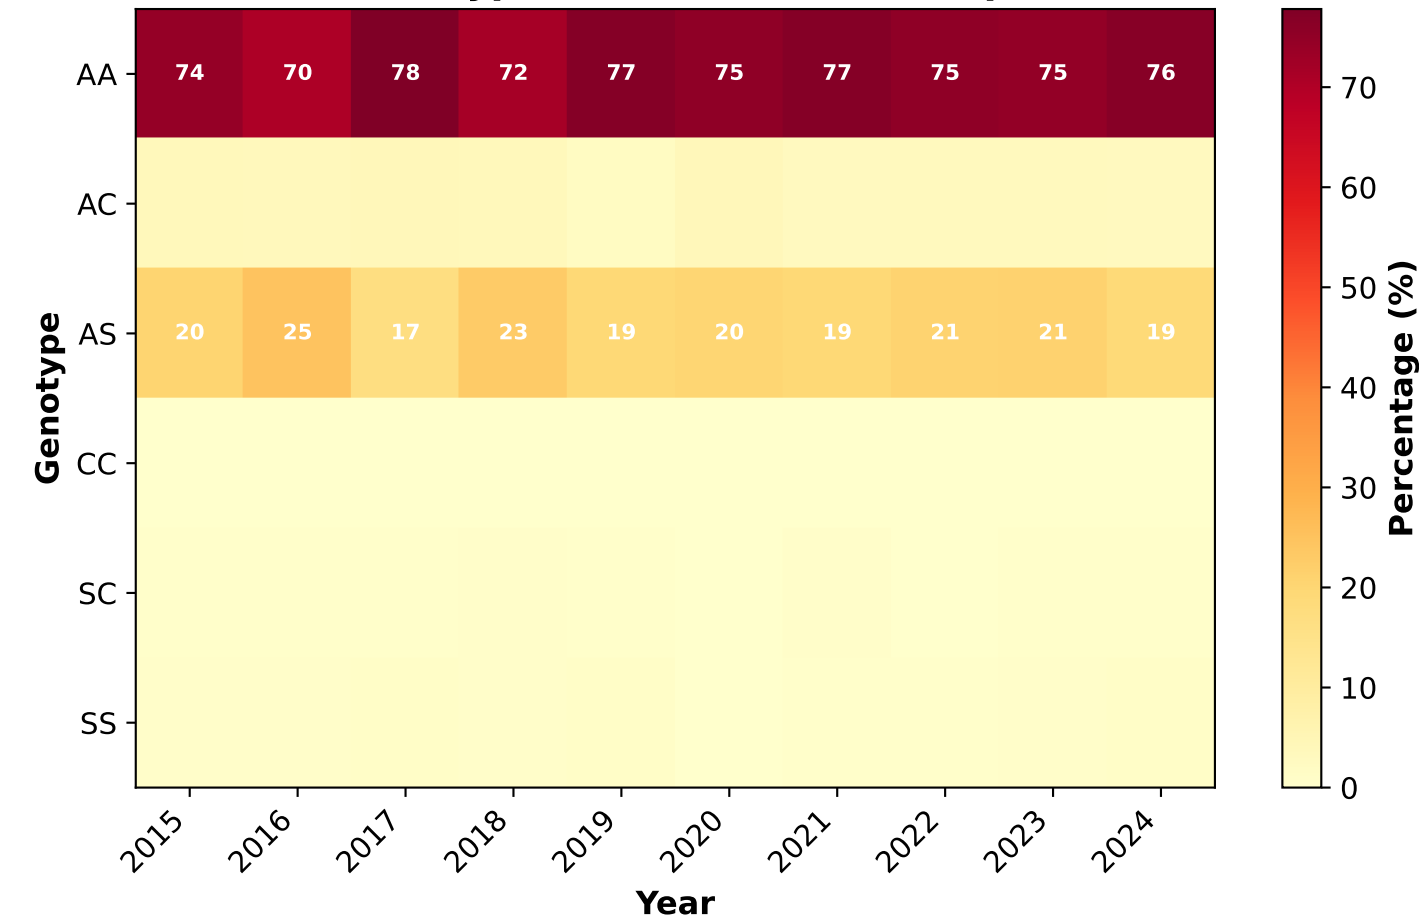

Clinical Category Distribution Over Time

Carrier vs Disease Rate Relationship

Genotype Distribution Heatmap

Clustering Analysis Summary:

Total Samples: 8,890
Years Analyzed: 10

Genotype Distribution:

- AA (Normal): 75.1%
- AS (Carrier): 20.4%
- AC (Carrier): 3.3%
- SS (Disease): 0.7%
- SC (Disease): 0.5%
- CC (Disease): 0.0%

Clinical Categories:

- Normal: 75.1%
- Carrier: 23.7%
- Disease: 1.2%

Key Finding:

K-means clustering validates the clinical categorization with clear separation between Normal, Carrier, and Disease groups.
